HELPFUL DESIGN TIPS FOR YOUR NEW SITE

a checklist for preparing your new online community

BRANDING KIT

When you are ready, simply submit a **DESIGN TEAM** support ticket from the backend of your site, and we'll reach out to get all the information we need to start designing and building your new online community! Following are a few tips and resources to consider that will help our design team.

LOGO FORMATS

We will need your logo in one of the following formats:

- .ai (Illustrator / Vector format)
- .eps (Illustrator / Vector format)
- Transparent .gif (150 dpi or greater) at 300 x 300 pixels (or 3" x 3" size)
- Transparent .png (150 dpi or greater) at 300 x 300 pixels (or 3" x 3" size)

If logo formats above are not available, please be prepared to provide the largest .jpg format available on a white background. Also, please do not supply .jpgs, .gifs or .pngs that are embedded in .eps or .ai formats! This will delay the design process.

*Note: Supplying our design team with fonts helps create that custom look you desire. Please consider sending us fonts for areas such as taglines, custom headers and footers, and design-heavy headers.

COLOR SCHEME & HEADER TREATMENT

The same color scheme and header will be used throughout the entire site, including the homepage.

Colors should be submitted in hexadecimal notation (for example FF00CC).

- Submit 2-3 primary site colors (not including white)
- Submit as many secondary colors as you would like

* If hex information is not available, please provide RGB notation, PMS notation or a color palette.

Need color help?

Download (ASE FORMATS) of your color palletes that you create and send to us via email from either one of these sites listed below

COLOR HELPERS:

- a. <http://kuler.adobe.com>
- b. <http://www.colourlovers.com/palettes>

TAGLINES & FONTS

Please provide any taglines or text you would like to include in the website header design. Also, be sure to send us the desired fonts for your taglines, custom headers and footers, and design-heavy text/headers, if applicable.

SUBMIT A MOCK-UP (OPTIONAL: for advanced designers)

You may also submit a mockup of your new site to help our designers better match your needs and vision.

Download specifications and a .psd template for your layout by clicking your layout design here:
