About YourMembership.com

The Complete Online Member Community®

Date: 09/17/2014

Product + Pricing

YourMembership.com's online member community and web-based membership management solution is cost effective and complete. YourMembership.com delivers social networking PLUS membership management.

Industry Solutions

YourMembership.com provides Software As A Service (SaaS-model) online member communities and membership management software for member-based organizations of all types and sizes around the globe including: associations, schools, universities, non-profit organizations, government agencies, corporations, congregations, foundations, fraternal organizations and social/professional networking sites.

With this hosted solution, there is no hardware to purchase or additional software to install. The site is advertising-free and is part of the customer's top-level website domain, so it is branded with the organization's name and website address. YourMembership.com NEVER uses or resells a customer's member data.

API for Third-Party Integration | The Raiser's Edge Compatible

YourMembership.com's application programming interface (API) enables real-time integration of core member data with other offline or third-party applications. The API allows customers to query, add and update online member profiles and data. It also provides Single Sign On with third-party systems and can act as an identity store to allow for identity federation. There is never a charge for data import/export.

YourMembership.com also is compatible with Blackbaud's The Raiser's Edge software.
